

# Faizan Siddiqui

## Frontend Developer

I am a frontend Developer with proficiency in React, Tailwind, Redux, and Redux Toolkit. I can create responsive and dynamic user interfaces with reusable and scalable components. Tailwind empowers me to build visually appealing and customizable user interfaces quickly and efficiently. I'm seeking role in an organization where I can grow and explore myself and my skills.

Suyalbari, Nainital, 8.0 cgpa

## PROJECTS

### Bankist

- code link [🔗](#)
- live website [🔗](#)
- I made this project using Javascript. I include nice animations in this projects. Its full of animations. I learn about animations from this project. I use Javascript API so called "Intersection Observer API". This project level up my Javascript concepts.

### React Navigation

- code link [🔗](#)
- live website [🔗](#)
- This is a landing page of original website "React Navigation". Javascript library so called Reactjs made my project success. Tailwind css is the main source for styling this project. I learn , how to layout a webpage using javascript and html in React from this project.

### Taskify

- code link [🔗](#)
- live website [🔗](#)
- A todo app for daily work. I code this project using React JS. I made UI using the React JS and give styling using Tailwind CSS. I added CRUD Features, like user can add list, delete the list, can edit the list, even can make mark the completion of list and most beautiful feature I added in this project is Drag and Drop feature. User can drag a completed task and drop in the completed section.

### Bitfinex

- code link [🔗](#)
- live website [🔗](#)
- This is a crypto website which provide the information about crypto price , cap, ups, downs etc. I use React JS in this project. I use React JS concepts like hooks and I learn a lot about hooks from this project. I use React AliceCarousel API in this project

### Fitness One

- code link [🔗](#)
- live website [🔗](#)
- This is an exercise website for gym freaky. I cover concepts of React JS through this project. I include online API of exercise to get the data.
